事業内容/Business Detail	We are a think tank specializing in foundation ground measures for houses and others. Our most important job is to offer safety and security to people who live there. Up to now, many aspects of ground investigation and improvement of the foundation ground have been difficult to understand for users. We have approached this problem head-on and built a system that integrates a series of tasks such as investigation, analysis, design, and construction. We will proceed with all the tasks in a customer-oriented manner so that users can be satisfied. "Invisible foundation ground measured by a visible system", we are working on this obvious theme with sincerity.
